الملخص

يهدف هذا البحث إلى دراسة وتقديم تقنيات التحكم في محركات дизيل ومحركات الوقود المزدوج. يتم تقديم نظرة شاملة على تاريخ وتطور محركات дизيل، مع التركيز على مكونات عملية احتراق الوقود داخل هذه المحركات. بالإضافة إلى ذلك، يتم مناقشة المحرك النموذجي F4L912 ومواصفاته الرئيسية.

تم التطرق أيضًا إلى مفهوم محركات الوقود المزدوج (دiesel/غاز طبيعي)، وشرح كيفية تحويل محركات дизيل التقليدية للعمل بالوقود المزدوج، بما في ذلك نظام الحقن بالمرجل والتحديات المرتبطة بذلك. الهدف الرئيسي من استخدام الوقود المزدوج هو تقليل الانبعاثات وتحسين كفاءة استهلاك الوقود، مع تقديم تحليلات لمزايا وعيوب هذه التقنية.

الكلمات الرئيسية

محركات дизيل، محركات الوقود المزدوج، احتراق الوقود، تحويل المحركات، تقنيات التحكم، الانبعاثات، كفاءة الوقود .

Résumé

Ce projet vise à étudier les techniques de contrôle pour gérer l'alimentation en énergie d'un moteur diesel converti en fonctionnement à double carburant utilisant le diesel et le gaz naturel. En se concentrant sur le moteur F4L912, l'étude explore l'intégration des systèmes de gaz naturel pour optimiser la combustion, améliorer l'efficacité énergétique et réduire les émissions. Les résultats visent à contribuer au développement de technologies de moteurs plus efficaces et respectueuses de l'environnement.

Mots clés : Moteur diesel-Système à double carburant-Gaz naturel-Efficacité énergétique-Contrôle intelligent-Optimisation de la combustion-Impact environnemental

Abstract

This project investigates control techniques for managing the power supply of a diesel engine converted to dual-fuel operation using diesel and natural gas. Focusing on the F4L912 engine, the study explores the integration of natural gas systems to optimize combustion, improve fuel efficiency, and reduce emissions. The findings aim to contribute to the development of more efficient and environmentally friendly engine technologies.

Acknowledgments

I would like to extend my deepest gratitude to my supervisors,

D. Boukhetala and M. Benbraika,

for their unwavering support, guidance, and encouragement throughout the course of this project. Their expertise and insights have been invaluable to my research and personal development.

I am also profoundly grateful to all the teachers who have educated and inspired me throughout my academic journey at ENP. Their dedication and commitment to excellence have profoundly shaped my knowledge and skills.

A special thank you goes to the entire faculty of the Command Processes Laboratory. Your professionalism, mentorship, and the opportunities you have provided for hands-on learning have been instrumental in my growth as a student .

Thank you all for your invaluable contributions to my academic and professional development.

Dedication

*To my dear mother,
To my dear father,
To my brothers Salah, Ritedj,
To my dear grandparents,
To all my family and friends,*

Akram
